#### Greenways

Communication routes exclusively reserved for non-motorised journeys. These routes should meet satisfactory standards of width, gradient, and surface condition, to ensure that they are both user-friendly and low-risk for users of all abilities.

Mainly using old railways and towpath channels.

For daily mobility, active tourism, healthy leisure, sport and exercise for everyone in urban or rural settings.

#### **Greenways, common caracteristics:**

- ✓ wide accessibility to the general public including people with reduced mobility.
- ✓ ease of use, safety and continuity of routes.
- ✓ Respect for the natural, cultural, historic and human environment of any crossed area.

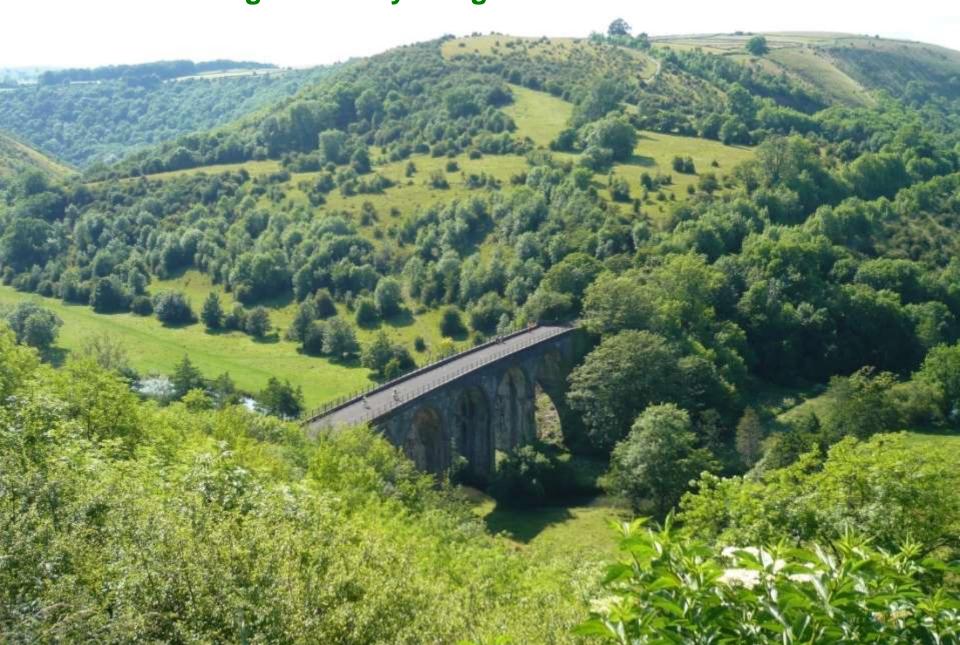

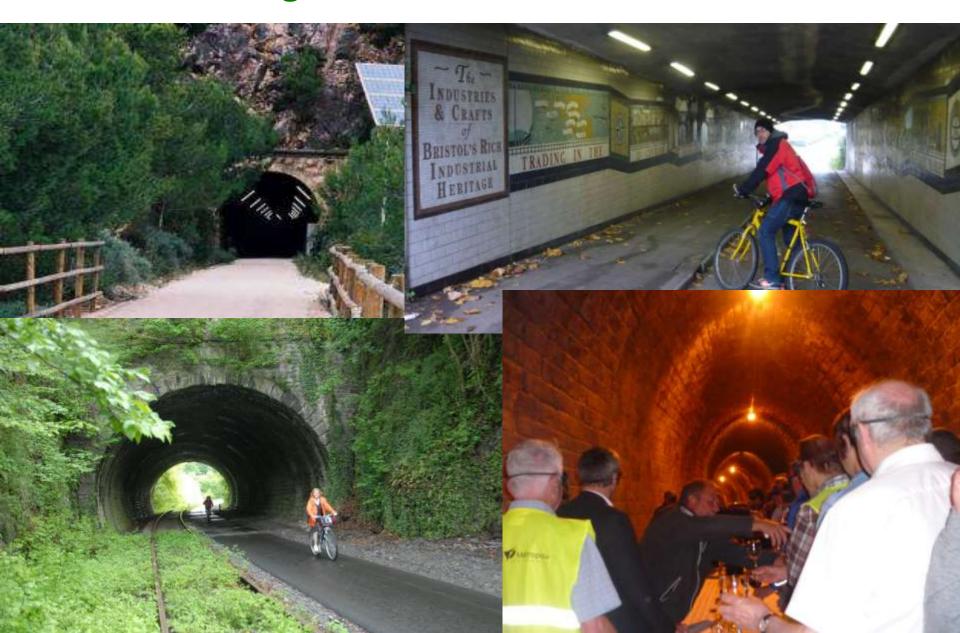

## Infraestructures that facilitates the access Conditioning of railway bridges

# Infraestructures that facilitates the access Safe and light tunnels

# **Signposting of the Greenways** Comber Greener

# Rehabilitation of former stations To install Services and equipments for turism

servicios y equipamientos ecoturísticos

Innumerable examples in Europe.
In Spain 71 stations of Green Routes have been already recovered or they are in project.

#### **Greenways4Tour**

Aim of the project: to promote and increase international awareness of European greenways as excellent facilities for cyclists, walkers and people with disabilities and to greatly improve sustainable tourism choices in Europe.

# Why cycletourism and accessible tourism?

Trend to the growth of the cycletourism in spite of the economic current situation.

Both are important and increasing niches of market in Europe and worldwide and the greenways are suitable infrastructures for its development.

The need of a continuous **route**, **safe**, **nice and signposted** is accepted by all and these are characteristics of the greenways.

## **Greenways: infrastructures suitable for sustainable tourism**

Gradients less than 3 %, rectilinear tracks, wide curves.

Exceptional and respectful access to nature, due to the use of preexisting infrastructures, integrated into the landscape, which allow passage around the countryside, the history, the culture and the past ... of Europe,

## 6th EUROPEAN GREENWAYS AWARD, 2013,

Viseu, Portugal, in cooperation with CIM Dão Lafões. 12 September 2013

Naviki is an exciting new web-based cycle route planner. It is free to use; It also turns the smartphone into a bicycle satnav device, thanks to free Naviki software (\*).

Project is supported by the EU Intelligent Energy Europe, (May 2011 - December 2013).

Naviki enhances public awareness about the positive effects of cycling, among them energy efficiency and the avoidance of CO2.

EGWA has an important role on Naviki European launch as Lead partner of the Work Package.

(\*) (Beta version)

EGWA main interest is to promote greenways trough Naviki.

EGWA, and some members have a personalised Naviki Landinpages, with information about cycle routes, and specific information about greenways

Some EGWA members take part of the advisory panel for external advice and evaluation.

# Now is the time to invest in greenways for all round benefits

- Greenways are a great asset for rural tourism in territories where such disused infrastructure can be acconditioned as greenways, preserving and enhancing this historic cultural heritage.
- Return on investment can be very high; in many cases the initial cost for setting up a greenway was compensated by newly generated income in 2-3 years.
- The creation and promotion of Greenways can greatly help to diversify the economy in rural areas attracting visitors, but also to be used for local people.
