# VeloMałopolska

What is the gamechanger  
and the most important  
element of the  
VeloDunajec?

# Bridges!

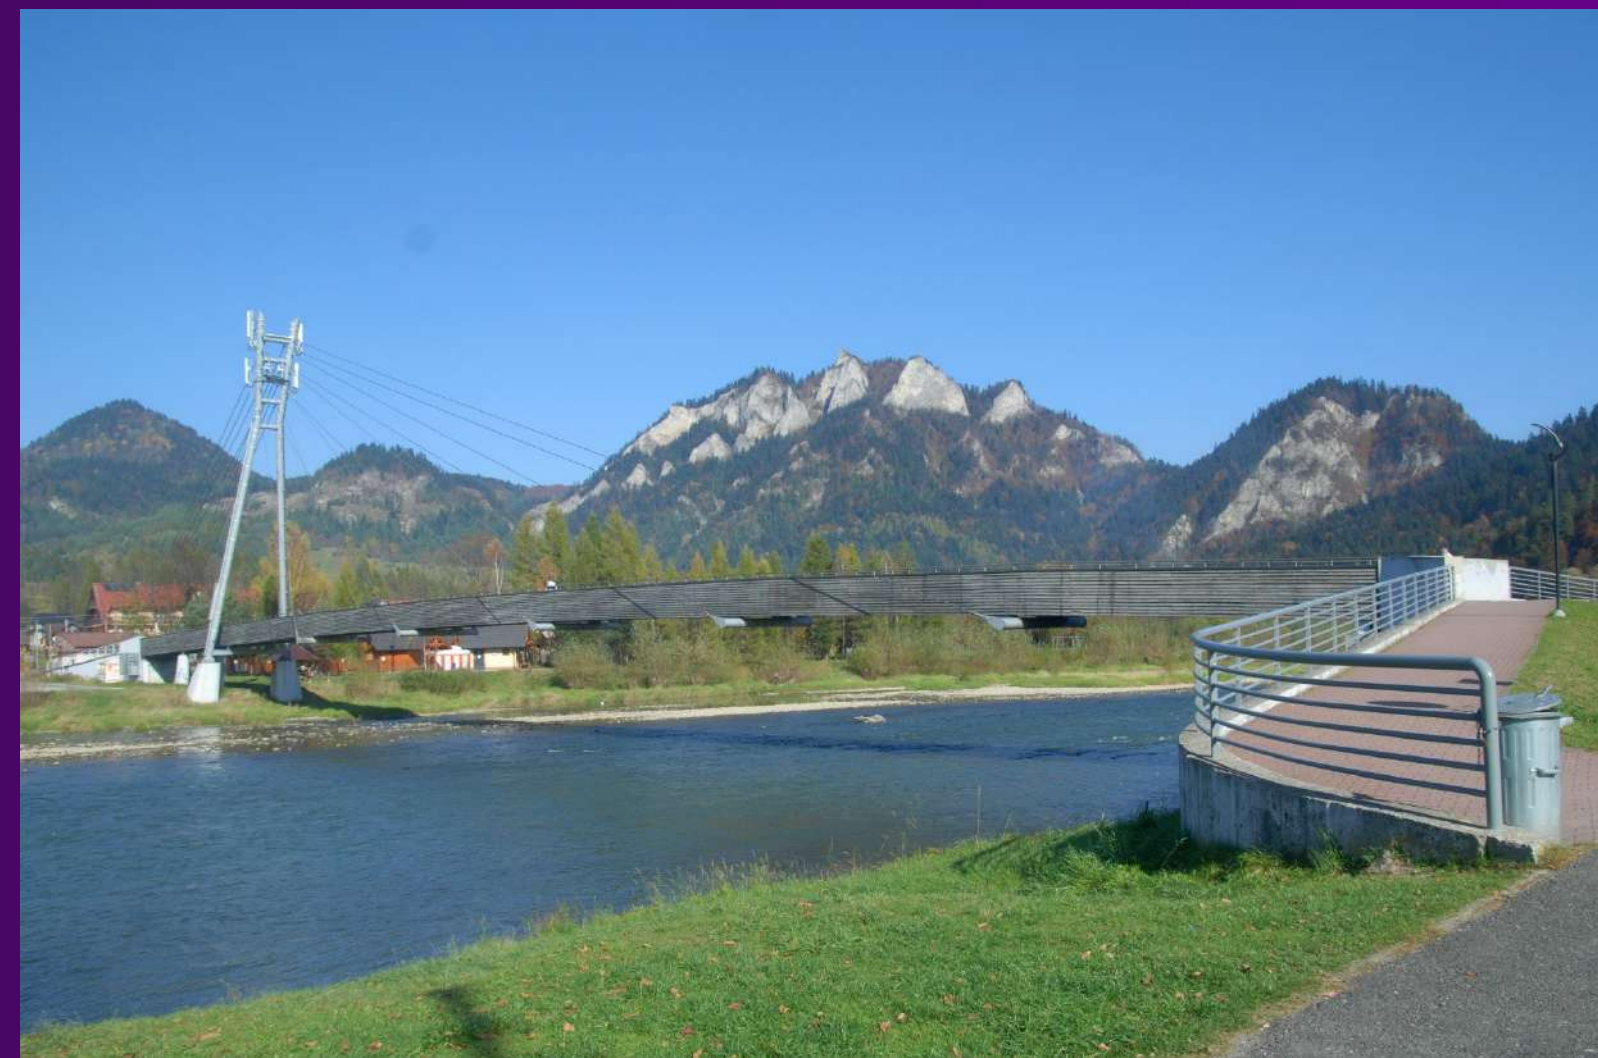

# The special ones!

Krościenko nad Dunajcem  
2024

 MAŁOPOLSKA

Sromowce Niżne  
2006

  
Małopolska  
Cycle Route Network

The „Zerwany Most” bridge in Krościenko over the Dunajec was destroyed by a flood in 1934 and rebuilt after 90 years in 2024

The footbridge in Sromowce Niżne, built in 2006, became a symbolic and practical link between Poland and Slovakia, and enabled pass for VeloDunajec route

By providing a safe crossing over the Dunajec river, it transformed the possibilities of developing the cycling route along the river and brought local communities on both sides of the border closer together.
